

## Gemini Lamp

 COOLON LIGHTING

“The ultimate union  
between elegant style  
and sophisticated  
technology.”

The Gemini Lamp enhances the ambience of any room with a simple press of a button; an ideal decorative piece whether switched on or off. Its simple shape and classic finish allows the lamp a unique versatility, complementing various interior decors.

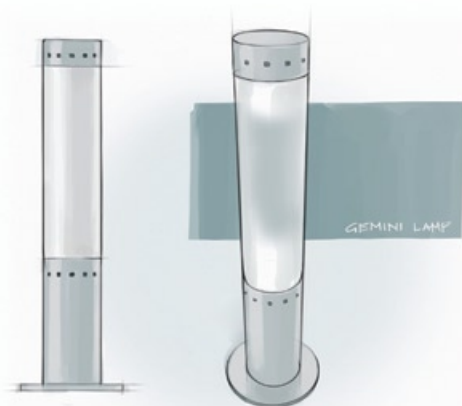

# Vivid Colours

Stimulate circulation with a strong red glow, and shine orange to encourage creativity, vibrancy and humour. Let your intellectual and logical mind be inspired in optimistic yellow, or meditate in the confident aura of violet light. Use blue to slow things down; it is the colour of honesty, devotion and aspiration, or the youthful turquoise to boost immunity and cool down after a frenzied day.

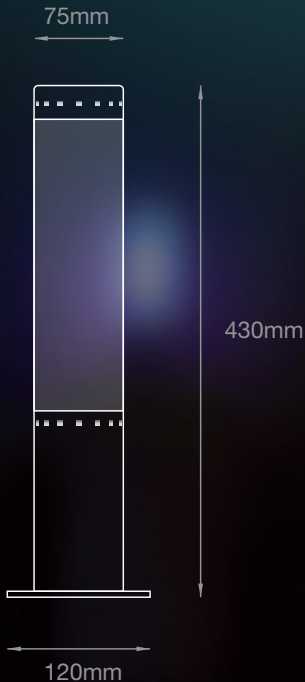

# Refined Simplicity

The compact IR remote control allows for full colour management on your Gemini Lamp. It enables you to choose from range of options; including individual colours, flashing and slow fading. No complex programming, no unattractive cables or wires, just simple, untainted, coloured light. Minimal heat production and the easy to use remote control make the Gemini Lamp safe for use by, and around, smaller children.

The Gemini Lamp boasts a stainless steel base and a hand-made double-layered frosted white glass column. The subtle combination of materials lends contemporary elegance and sophistication to any space, including bedrooms, home theatres, and any bar or entertainment area.
